

SIDDHARTH KUMAR

Software Developer | Full Stack & AI/ML Engineer

siddharth.sk324@gmail.com | +91 7004434391 | Sikkim, India | siddharth.buzz | github.com/SparkSidd | linkedin.com/in/sparksidd

PROFESSIONAL SUMMARY

Computer Science Engineering student graduating in 2027, with hands-on experience building full-stack web applications, AI-integrated tools, and mobile applications. Comfortable working across the stack — backend APIs, frontend interfaces, databases, and increasingly, machine learning and LLM integration. Delivered measurable impact during an industry internship at NBPDCI, where a data-driven anomaly detection dashboard reduced manual inspection work by 60%. Also converted a production website into a working mobile app during an internship at Aibi Technologies, gaining hands-on experience with Flutter and native app development. Proven ability to lead teams under pressure, with multiple hackathon finalist positions. Quick to pick up new frameworks and genuinely enjoys taking a project from a rough idea to something that actually works end to end.

EDUCATION

Sikkim Manipal Institute of Technology

2023 – 2027 (Expected)

B.Tech, Computer Science Engineering (Minor: Cybersecurity)

7th Semester

Relevant Coursework: Data Structures & Algorithms, Database Systems, Computer Networks, AI/ML, Software Engineering, Compiler Design

Higher Secondary Education (12th) — Science (PCM)

2021 – 2023

Achievements: 91 percentile JEE Mains, Qualified for JEE Advanced, WBJEE Rank Under 8000

PROFESSIONAL EXPERIENCE

Mobile Development Engineer Intern — Aibi Technologies

May 2026 – Jul 2026

- Converted an existing production website into a fully working mobile application, handling the transition from web to native functionality
- Worked hands-on with Flutter and Dart in Android Studio, picking up mobile app architecture and platform-specific considerations along the way
- Took part in code reviews and picked up the team's workflow for testing and releasing changes

Summer Intern, Department of IT — NBPDCI

Jun 2025 – Aug 2025

- Built a Streamlit-based dashboard for electricity theft detection using anomaly detection on consumption patterns
- Implemented data visualization pipelines using Pandas and Plotly to identify irregular usage patterns
- Reduced manual inspection workload by around 60% through an automated flagging system
- Presented findings and recommendations to senior management
- Technologies: Python, Streamlit, Pandas, Plotly, NumPy, SQLite

KEY PROJECTS

DocFusion — Document Intelligence Platform

Lets you drop in a CSV, PDF, or Excel file and just ask questions about it in plain English. Handles parsing across formats, auto-suggests relevant charts, and uses a dual-LLM setup (OpenAI + Gemini) to keep answers grounded in the actual document.

Tech: FastAPI, React, Vite, Pandas, OpenAI, Gemini, TypeScript

PhishDetectAI — Chrome Extension + API

Checks URLs against multiple threat-intel sources — Google Web Risk, Wolfram, and local heuristic rules — in real time, then falls back to Gemini AI when nothing else catches it.

Tech: Python, FastAPI, Pydantic, Google Web Risk API, Wolfram API, Gemini AI, Chrome Extension API

Web Performance Analyzer & Optimizer AI

Pulls Core Web Vitals via Google's PageSpeed API and turns raw scores into plain-language, AI-generated optimization suggestions, with performance history tracked over time.

Tech: React, TypeScript, Node.js, Express, MongoDB, PageSpeed Insights API

FinGuard AI Dashboard

Real-time financial transaction monitoring dashboard with interactive network graph visualization, live data feeds, and analytics aimed at spotting suspicious transaction patterns.

Tech: React, TypeScript, Cytoscape.js, Recharts, Vite

MyBudgetAI — Personal Finance Assistant

Scans receipts using OCR, auto-sorts expenses into categories, and answers budget questions conversationally through Gemini.

Tech: Python, Streamlit, Pandas, Tesseract OCR, Gemini API, Scikit-learn

NeuroDoc — Document Intelligence System

NotebookLM-style conversational document analysis, letting users interact with documents through natural language queries and get contextual, source-grounded answers.

Tech: Vite, React, TypeScript, Tailwind CSS, shadcn/ui

Indian Sign Language Translator — Accessibility Web App

Tracks 21 hand landmarks in real time using MediaPipe and classifies them into ISL signs through a model fine-tuned on MobileNetV2. Outputs synced text and speech, runs as a Progressive Web App.

Tech: React, TypeScript, MediaPipe, TensorFlow.js, MobileNetV2, Web Speech API

Mental Health Support Chatbot

Ethically-designed conversational AI with crisis detection, sentiment analysis, and a safety-first response architecture that surfaces professional resources when needed.

Tech: Python, FastAPI, Hugging Face Transformers, NLP, SQLite

Fake News Detection System

Combines a local TF-IDF + Logistic Regression model with Gemini-based reasoning to verify claims, presenting explainable results through a Streamlit interface.

Tech: Python, Scikit-learn, TF-IDF, Streamlit, Google Gemini API

C Language Interpreter — Compiler Coursework

Wrote a lexer, recursive descent parser, and interpreter from scratch in C, including operator precedence handling and a symbol table with nested scope support.

Tech: C, Lexer/Parser Design, Abstract Syntax Trees, Symbol Tables

Electricity Theft Detection System

Anomaly detection system analyzing consumption patterns to flag likely theft cases. Developed during the NBPDCI internship, later expanded with additional visualizations.

Tech: Python, Streamlit, Pandas, Plotly, NumPy, SQLite

Instagram Extension

Lightweight Chrome extension built in a 2-hour rapid development sprint to identify non-mutual followers, demonstrating quick prototyping and DOM manipulation skills.

Tech: JavaScript, Chrome Extension API

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C, SQL

Frontend: React, Next.js, Tailwind CSS, Material-UI, shadcn/ui, Vite, Framer Motion, PWA

Backend:	FastAPI, Flask, Node.js, Express, RESTful APIs, WebSocket, Async Processing
Databases:	MongoDB, PostgreSQL, SQLite, Vector Databases
AI/ML:	TensorFlow, Scikit-learn, Hugging Face Transformers, OpenCV, MediaPipe, NLP, Computer Vision
LLM & AI Integration:	OpenAI GPT, Google Gemini, Prompt Engineering, RAG, LangChain
Mobile:	Flutter, Dart, Android Studio
Tools & DevOps:	Git, Docker, Linux, AWS, Chrome Extension Development

HACKATHONS & COMPETITIVE ACHIEVEMENTS

- **InnoFusion 2.0** — Finalist (Top 5), UEM Kolkata, 2025, Team Lead
- **Devopia 2.0** — Finalist, Dell Technologies Partner Hackathon, 2025, Team Lead
- **Tech Adrishta 2025** — Runner-Up, College Annual Tech Fest Hackathon, Team Lead
- **Smart India Hackathon (SIH)** — Qualified Internal Rounds, 2024 & 2025, Team Lead
- **World's Largest Hackathon by Bolt** — Devpost, 2024
- **Hawk hacks** — Devpost, 2024
- **InnovWar Hackathon 2025** — 24-Hour Competitive Challenge

LEADERSHIP

AI/ML Co-Lead — Encoders (Coding Club), SMIT

Organizing technical workshops, leading AI/ML initiatives, and mentoring peers in machine learning and software development.

Chief Website Administrator — SMIT MUN Club

Managing website infrastructure, ensuring performance and user experience.

Event Management, Aesthetics & Production Lead — CINEMATES Club

Coordinating large-scale events and managing creative production.

Previous Roles: PR Artistii – SMIT | PR Co-Lead – Codhers | Member – Enactus, IIC, Innovison | Internshala Student Partner

CERTIFICATIONS

Networking: CCNA 1, 2 & 3 — Cisco Networking Academy

AI & Cloud: Google AI Essentials (Coursera) · Generative AI for Software Development (Coursera) · DevOps and AI on AWS — 100% Grade (Coursera/AWS) · GenAI Prompt Engineering & AI Agent Micro Certification (PwC)

Development: Full Stack Developer Bootcamp (GeeksforGeeks) · Complete TensorFlow Course (GeeksforGeeks) · Python Essentials 1 & 2 (Cisco) · Introduction to DevOps (Coursera/IBM)

Data: Introduction to Data Science (Cisco) · Modern Data Systems (PwC) · PostgreSQL Fundamentals (Coursera/AWS)

Security: Deloitte Cybersecurity Virtual Internship (Forage)

KEY ACHIEVEMENTS

✓ **14 Projects Built** — Spanning full-stack development, AI/ML, and mobile domains

✓ **60% Efficiency Gain** — Reduced manual inspection workload at NBPDCI through ML-powered anomaly detection

✓ **Multiple Hackathon Finalist** — Top 5 at InnoFusion 2.0, Finalist at Devopia 2.0 (Dell Technologies), Runner-Up at Tech Adrishta 2025

✓ **SIH Qualifier** — Cleared Smart India Hackathon internal rounds in both 2024 & 2025

✓ **20+ Professional Certifications** — Including CCNA (3 courses), AWS (100% grade), Google AI, IBM DevOps, PwC

✓ **AI/ML Technical Lead** — Co-Lead at Encoders Club, organizing workshops and mentoring peers

✓ **Cross-Domain Experience** — Built and shipped projects across web, mobile, NLP, computer vision, and finance
